## **6. REPLACE THE PROJECT "THE VINEYARD HEALTH CLINIC" WITH "INDUSTRIAL / SHEDS" FROM HOME PAGE**

## **7. Website needs to create a mobile version as well.**

## **8.LOCATION OF PROJECT , DON'T SHOW HOUSE NUMBER .**

## **9.REMOVE SCROLL FROM COVER PAGE HEADER.**

## **10. HOMEPAGE PICTURE SEQUENCE**

## **11. MAIL SENDING ISSUE**

## HOW IT WORKS

# Three steps *from brief* to approval.

Every project follows the same sequence. Site and brief analysis first — design and documentation follow. One contact handles it through to council sign-off.

01

## Brief & site

Tell us the block, the orientation, and what you want to build. We visit the site and return with a first-pass massing concept.

02

## Design & render

Floor plans, elevations, and a photorealistic 3D render. Materials resolved, cost-tested against the brief, ready for council.

03

## DA/CDC approval

We lodge the Development Application and manage all council RFIs through to consent. One point of contact from first sketch to signed-off drawings.

04

## Complete Project Delivery

From engineering and town planning to BASIX and specialist consultants, we coordinate every discipline—providing one seamless point of contact from concept through approval.
